Product Summary

Matica EdiSecure ART YMCK-UV Full-Color Ribbon with Fluorescing (UV Fluorescent) Panel

Product Description

EDIsecure ART YMCK-UV Color ribbon is the ideal solution to secure the ID cards in an easy, quick, accurate and sure way.

The fluorescing panel produces **grayscale images and text that only appear when the card is exposed to ultraviolet (UV) light.**

Ultraviolet printing helps secure your cards without compromising their readability. It represents a significant security feature that **helps prevent fraud, counterfeiting and forgery**. Therefore, this ribbon is ideal for highly secure government applications.
